

Workshop on Renewable Energy and Sustainability (Energy R&D Workshop II)

Objectives

This workshop considers the full range of key technology, commercialization, and government policy in the renewable energy research and industry. This workshop is focused on introducing and discussing the renewable energy and biobased technologies to provide opportunities for future collaborative research works among the people from both the US and Korea.

Scope (topics covered)

- a. Bioenergy
- b. Solar energy
- c. Fuel cells
- d. Wind energy

Format

- a. The workshop will be a full-day event.
- b. The workshop will include the following sessions:
 - i. Presentations, including an invited talk
 - ii. Panel sessions dedicated to discussion

Symposium Organizers

Chairs

Tae Hyun Kim (Iowa State University)
Kee Suk Nahm (Chonbuk National University)

Organizing Committee

Michael Hyun Chul Jin (University of Texas, Arlington)
Burt Lee (Clemson University)
Jun Seok Kim (Kyonggi University)
Jae Sung Lee (Postech)
