

Women in Science and Engineering Forum (WiSE)

Objectives

The goal of the WiSE Forum is to promote cooperation between women scientists, engineers, and entrepreneurs from the USA and Korea by discussing and sharing their achievements and current interests. This forum will also provide an enhancement of the network of both American and Korean women scientists and engineers. This year, the WiSE forum will also be organized by KWiSE as the previous WiSE forum at UKC conference.

Scope

Women scientists and engineers at the cutting edge science and engineering will be invited. We are planning to invite 6 speakers including 1 non-ethnic Korean in various science and engineering fields.

Session Title and Topics Covered
